

## Instructions for Authors: Afr. Infect. Dis. (2017) 11(2):102-105

Publisher: African Traditional Herbal Medicine Supporters Initiative (ATHMSI)

Web page: <http://journals.sfu.ca/africanem/index.php/AJID/index>

The African Journal of Infectious Diseases (AJID), is a peer-reviewed, international journal that publishes papers which make an original contribution to the understanding of infectious diseases. Any paper relating to impact, care, prevention and social planning, will be considered for publication in AJID. Reports of research related to any aspect of the fields of microbiology, parasitology, infection, and host response, whether laboratory, clinical, or epidemiologic, will be considered for publication in the journal. Major Articles, Short Communications, Correspondence, Editorials, and Review articles are considered for publication. Papers will be accepted on the understanding that their contents have not been published, or submitted for publication, elsewhere. All submitted papers will be refereed by at least two appropriately-qualified referees. The Journal welcomes the submission of manuscripts that meet the general criteria of significance and scientific excellence. Papers will be published approximately two-to-three months after acceptance.

### Electronic Submission

Electronic Submission: DIRECT UPLOADING of papers is now the only source of submitting manuscripts online. You may do so by registering as an author, and following the uploading instructions step-by-step at: <http://www.editorialmanager.com/ajid/default.aspx> or by clicking on Online Submissions on new site on our old site. A manuscript number will be mailed to the corresponding author same day or within three days. The cover letter should include the corresponding author's full address and telephone/fax numbers, and should be in an e-mail message sent to the Editor, with the file, whose name should begin with the first author's surname, as an attachment.

Regular articles: These should describe new and carefully-researched findings that have arisen from experimental procedures. The articles should be given in sufficient detail for others to verify the work. Authors should submit data that have arisen from animal and human studies in an ethically-acceptable way by following guidelines set up by the World Health Organization (WHO). Authors submitting papers are advised to read online WHO guidelines on these subjects (<http://www.who.int/medicines/library/trm/researchdocs.shtml>). Papers that violate these principles will not be considered.

Policy and ethics: The author, in his/her covering letter, must also declare that the submission was performed according to the national and international institutional rules governing animal experiments, clinical studies and biodiversity rights. Authors should submit data that have arisen from animal and human studies in an ethically-acceptable manner by following guidelines as set up by WHO. Authors submitting papers are advised to read online WIPO and WHO guidelines on these subjects ([http://www.wipo.int/tk/en/consultations/draft\\_provisions/draft\\_provisions.html](http://www.wipo.int/tk/en/consultations/draft_provisions/draft_provisions.html) and <http://www.who.int/medicines/library/trm/researchdocs.shtml>). The authors should indemnify that they have acquired appropriate "prior informed consent" (PIC) of patients or volunteers used in their studies. This means that the onus is on the authors, and not on the journal, regarding this important ethical issue. Moreover, they should state this as a part of the protocol describing how these types of surveys were made. Papers that violate these principles will not be considered.

Author contributions: Each author should state his/her contribution to the publication.

Declaration of interest: It is mandatory that authors disclose any actual or potential conflict of interest, including any financial, personal or other relationships with other people or organizations, that could inappropriately influence, or be perceived to influence, their work.

Submission declaration and verification: Your submission implies that the work has not been published previously, or is not under consideration for publication elsewhere, that the publication is approved by all authors, and tacitly or explicitly, by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service CrossCheck - <http://www.ithenticate.com/>

Changes to authorship: The list and order of authors must be considered carefully before submitting manuscripts by authors at the time of the original submission. Therefore, any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted, and only if approved by the journal Editor.

A request for a change of author can only be made when the following conditions are met: (a) the reason for the change in author list, and (b) written and signed confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed.

The Editor can only consider the addition, deletion or rearrangement of authors after the manuscript has been accepted, except in exceptional circumstances. During this period, publication of the manuscript will be suspended. If the paper has already been published in AJID's online issue, requests approved by the Editor will result in a corrigendum.

Article transfer service: This journal is a part of Article Transfer Service of ATHMSI. This means that if the Editor feels your article is more suitable in AJTCAM, then you may be asked to consider transferring the article to AJTCAM. If you agree, your article will be transferred automatically on your behalf with no need to reformat. Please, note that your article will be

Attribution

CC BY: This license lets others distribute, remix, tweak, and build upon your work, even commercially, as long as they credit you for the original creation. This is the most accommodating of licenses offered. Recommended for maximum dissemination and use of licensed materials.

[View License Deed](#) | [View Legal Code](#)

Authors can also self-archive their manuscripts immediately and enable public access from their institution's repository after an embargo period. This is the version that has been accepted for publication and which typically includes author-incorporated changes suggested during submission, peer review and in editor-author communications.

Embargo period For subscription: AJID has an embargo period of 12 months.

Short Communications: A Short Communication is suitable for recording the results of complete small investigations, or giving details of new models or hypotheses, identification, innovative methods, techniques, clinical trials and epidemiological studies.

Reviews: Submissions of reviews and perspectives covering topics of current interest are welcome and encouraged. Reviews are also peer-reviewed.

Review Process: All manuscripts are reviewed by an editor and members of the Editorial Board, or qualified outside reviewers. Decisions will be made as rapidly as possible, and the journal strives to return reviewers' comments to authors within 2 weeks. It is the goal of AJID to publish papers within 12 weeks after submission.

Regular articles: All portions of the manuscript must be typed double-spaced, and all pages numbered starting from the title page.

The 'Title' should be as brief as possible, describing the contents of the paper. The 'Title Page' should include the authors' full names and affiliations, the name of the corresponding author along with phone, fax and e-mail information. Present addresses of authors should appear as a footnote.

The 'Abstract', which should be included at the beginning of the manuscript, should be informative and completely self-explanatory. It should briefly present the topic, state the scope of the experiments, indicate significant data, and point out major findings and conclusions. It should be structured into: Background, Materials and Methods, Results and Conclusion. The Abstract should not be more than 250 words in length. Complete sentences, active verbs, and the third person should be used, and the abstract should be written in the past tense. Following the abstract, about 3 to 6 key-words that will provide indexing references should be listed.

A list of non-standard Abbreviations should be added. In general, non-standard abbreviations should be used only when the full term is very long and used often. Each abbreviation should be spelt out and introduced in parentheses the first time it is used in the text. Only recommended SI units should be used.

The 'Introduction' should provide a clear statement of the problem, the relevant literature on the subject, and the proposed approach or solution. It should be understandable to colleagues from a broad range of scientific disciplines.

Materials and methods should be complete enough to allow experiments to be reproduced. However, only truly new procedures should be described in detail; previously published procedures should be cited, and important modifications of published procedures should be mentioned briefly. Capitalize trade names and include the manufacturer's name and address. Sub-headings should be used. Methods in general use need not be described in detail.

Results should be presented with clarity and precision. The results should be written in the past tense when describing findings in the authors' experiments. Previously-published findings should be written in the present tense. Results should be explained, but largely without referring to the literature. Discussion, speculation and detailed interpretation of data should not be included in the Results but should be put into the Discussion section.

The Discussion should interpret the findings in view of the results obtained in this and in past studies on this topic. State the conclusions in a few sentences at the end of the manuscript.

The Results and Discussion sections can include subheadings, and when appropriate, both sections can be combined.

The Acknowledgments of people, grants, funds, etc., should be brief.

## Instructions for Authors: *Afr. Infect. Dis.* (2017) 11(2):102-105

Publisher: African Traditional Herbal Medicine Supporters Initiative (ATHMSI)

Web page: <http://journals.sfu.ca/africanem/index.php/AJID/index>

Tables should be simple and kept to a minimum. Tables should be typed double-spaced throughout, including headings and footnotes. Each table should be on a separate page, numbered consecutively in Arabic numerals, and supplied with a heading and a legend. Tables should be self-explanatory without reference to the text.

Figure legends should be typed in numerical order on a separate sheet. Graphics should be prepared using applications capable of generating high resolution GIF, TIFF, JPEG or Powerpoint before pasting in the Microsoft Word manuscript file. Tables should be prepared in Microsoft Word. Use Arabic numerals to designate figures and upper case letters for their parts (Figure 1). Begin each legend with a title and include sufficient description so that the figure is understandable without reading the text of the manuscript. Information given in legends should not be repeated in the text.

References: In the text, a reference identified by means of an author's name, should be followed by the date of the reference in parentheses. When there are more than two authors, only the first author's name should be mentioned, followed by 'et al'. In the event that an author cited has had two or more works published during the same year, the reference, both in the text and in the reference list, should be identified by a lower case letter like: 'a' and 'b' after the date to distinguish the works. Examples: Ojewole (2000), Adewunmi et al. (2003), (Kelebeni, 1983), (Addy, 1992), (Chege, 1998; Elujoba, 1987a,b; Tijani, 1993,1995), (Gamaniel et al., 2001).

References should be listed at the end of the paper in alphabetical order. Articles in preparation or articles submitted for publication, unpublished observations, personal communications, etc., should not be included in the reference list, but should only be mentioned in the article text (e.g., A. Elujoba, Obafemi Awolowo University, - personal communication). Journal names are abbreviated according to Chemical Abstracts. Authors are fully responsible for the accuracy of the references.

1. Kamanzi-Atindehou, K., Koné, M., Terreaux C., Traore , D., Hostettmann, K. and Dosso , M. (2002). Evaluation of the antimicrobial potential of medicinal plants from the Ivory Coast. *Phytother. Res.*, 16: 497 – 502
2. Vinegar, R.; Truax, J.F., Selph, J. L. and Voelker, F. A. (1982). Pathway of onset, development and decay of carrageenan pleurisy in the rat. *Fed. Proc.* 41: 2588–2595.

Short Communications: Short Communications are limited to a maximum of two figures and one table. They should present a complete study that is more limited in scope than is found in full-length papers. The items of manuscript preparation listed above apply to Short Communications with the following differences: (1) Abstracts are limited to 150 words, and (2) Results and Discussion should be combined into a single section.

Book reviews: Books for review should be sent to the Editors.

Conference Announcements and News: These should be sent to the Editors.

Proofs and Reprints: Electronic proofs will be sent (e-mail attachment) to the corresponding author as a PDF file. Page proofs are considered to be the final version of the manuscript. With the exception of typographical or minor clerical errors, no changes will be made in the manuscript at the proof stage. Because AJID will be published freely online only for the first year (to attract a wide audience), authors will have free electronic access to the full text (in both HTML and PDF) of the article. Authors can freely download the PDF file from which they can print unlimited copies of their articles.

Fees and Charges: Original research articles will attract a nominal fee of US\$300.00 for a ten-page manuscript. Every other extra page will attract an additional US\$30.00 per page. Fast-Tracking of manuscripts does not guarantee acceptance for publication, and will attract a charge of US\$1,000.00.

Subscription: Annual subscription for printed copies is US\$150.00., single copy is US\$50.00; Institutions and libraries is US\$500.00.

Advertisements and Advertising rates: Back cover full colour: US\$750.00; Inside covers: US\$625.00; Full page colour: US\$510.00; Half page: US\$320.00; Half page black and white: US\$260.00., One quarter page: US\$195.00. For details, contact the Editors-in-Chief.

Notice: No responsibility is assumed by the publisher for any use of operation of any methods, products, instructions or ideas contained in the material herein. All advertising material is expected to conform to ethical, medical standards, their inclusion in the publication does not constitute an endorsement of the quality or value of such product by the manufacturer.

Plagiarism: Permission from the copyright owner(s) of reproduced tables and illustrations must be obtained and a copy of the permission letter submitted to AJID. The source must be clearly acknowledged under the table or the illustration. Copying text, photographs, tables or graphics from any source and using it as one's own is considered plagiarism whether or not a reference to the copied portion is given.

### Submission Preparation Checklist:

As part of the submission process, authors are required to check off their submission's compliance with all of the following items, and submissions may be returned to authors that do not adhere to these guidelines:

The submission has not been previously published, nor is it before another journal for consideration (or an explanation has been provided in Comments to the Editor).

The submission file is in Microsoft Word, RTF, or WordPerfect document file format.

All URL addresses in the text (e.g., <http://pkp.sfu.ca>) are activated and ready to click.

The text is single-spaced; uses a 12-point font; employs italics, rather than underlining (except with URL addresses); and all illustrations, figures, and tables are placed within the text at the appropriate points, rather than at the end.

The text adheres to the stylistic and bibliographic requirements outlined in the Author Guidelines, which is found in 'About the Journal'.

The text, if submitted to a peer-reviewed section (e.g., Articles), has had the authors' names removed. If an author is cited, "Author" and year are used in the bibliography and footnotes, instead of author's name, paper title, etc. The author's name has also been removed from the document's Properties, which in Microsoft Word is found in the File menu.

## Copyright Notice

Articles can be used for educational and non-commercial purposes. The copyrights of articles are retained by the authors with publication rights granted to AJID.

## Privacy Statement

The names and email addresses entered in this journal site will be used exclusively for the stated purposes of this journal and will not be made available for any other purpose or to any other party.
